# Preface

Steps to Verbal Reasoning is a collection of carefully graded books designed to put pupils through the skills needed for verbal reasoning.

It is hoped that at the end of the series, the pupils who use it would have a basic understanding in tackling any past question paper on Verbal Aptitude, and that it would guide the child step-by-step to a brilliant performance in the common entrance examination, Universal Basic Education examination and similar intelligence tests. Since solutions to problems in the books demand careful attention and reasoning, the series impact, gradually, these skills to children.

It is however very important for the teacher to structure the learning process even though the exercises are self-explanatory.

Remember, we learn by doing, but we learn best of all by doing correctly.

In each of the books, the exercises and tests become progressively difficult. The books can be used at home and in school. There is an answer book for the series.

In this revised edition, more exercises have been included to expand further the pupils' activities and to prepare them for Universal Basic Education examinations.

Steps to Verbal Reasoning has a companion series called Steps to Quantitative Reasoning.
